

Solar Charge Controller 12 V 20 A

With Dusk to Dawn Control

Model SOLCHR12V20AD2D

- Solar Panel Power upto 250W maximum
- Auto high battery charge cutoff at 14.5 V
- Auto low battery load cutoff 10.5 V or transfer to grid power 11.5 V
- Recommended battery 40 AH to 150 AH
- 16 char X 2 lines alphanumeric display
Displays digitally The battery voltage, the solar voltage

New Age Electronics

110 New Modella Indl Estate, Padwalnagar,
Thane (W) 400 604

- Automatic switch on Load at dusk and switch off Load at dawn
- When Grid power is present solar charge controller conserves battery when battery volt falls below 11.5 V and transfers load to grid. If grid fails after load is transferred to grid it transfers the load back to battery until battery is completely discharged upto 10.5 volt or grid is restored
- Intelligent microcontroller handles all the charging
- Warrantee of unit 1 year
